#PROFILE

To work in an organisation where I can use my skills and knowledge to deliver value added results as well as further enhance my learning and develop my career in the field.

#TOPSKILLS

AI, ML, Tensorflow Keras
numpy, pandas, matplotlib
skLearn, OpenCV, GIT
C, C++, python
HTML, PHP, Wordpress, JS
MySQL, MongoDB
ROS 2, Gazebo, Rviz, Nav2
STM32, RPI, BeagleBoard, Orin
i2c, SPI, UART, EtherCAT

#SOCIAL SKILLS

Project Management
Organization
Planning
Communication
Leadership

#EXPERIENCE

Software/Embedded Engineer in HRG, China

Dec 2024 - Jan 2025

Project: Exoskeleton System Development

Setup and Established Embeded system communications with sensors and Actuators and Developed GUI using QT for the Exoskeleton.

ROS Engineer in AdvanSoft

Feb 2023 - Aug 2024

Project: Autonomous Moblile Robot for Security

Worked on ROS 2 and Nav2 for autonomus security robot, done visual and lidar based point cloud, occupancy grid mapping, developed modular software nodes with diagnosis and performance profiling, integrated with behaviour trees for the various modes and handling different conditions. Performed navigation testing, tuning of the controllers with data analysis, developing AI for threat detection and API's for frontend and remote control of the robot.

Robotic System Engineer in Comofi Medtech Pvt Ltd

Sep 2021 - Jan 2023

Project: Medical Arm Robot For Surgery

Developed the kinematics and path planning for medical arm robot to avoid the obstacles and achieve the target by using EtherCAT communication in ROS 1 and ROS 2. Done Data Analysis and developed Machine learning algorithms and AI models to analyze the medical data for surgery.

Graduate Engineer and IT operations in Endoenergy

June 2019 - Aug 2021

Project: Exoskeleton System Development

Developed ROS 1 and ROS 2 packages for the exoskeleton and collected the data in real time for supporting the R&D requirements. Created software architecture for the exoskeleton to communicate within the exo and cloud with Artificial Intelligence and Machine learning. Made simulations of exoskeleton to mimic the real world environment. Worked on embedded development boards like STM32, Raspberrypi, Beaglebone and sensor calibration for different sensors. Established the IT infrastructure by setting up the switch, firewall and server. Made android, web applications for project as per the requirement.

PHP Developer in Ayatas software solutions india Pvt Ltd

Feb 2016 - Aug 2016

Developed websites using wordpress and php based frameworks. Closely worked with designers to create clean interfaces and intuitive interfaces and worked with senior developers to manage large and complex projects with authentication forms to check and submit the forms with valid data for corporate clients. Migrated old websites to wordpress and created custom plugins to provide full customization as per the client requirements.

#EDUCATION

M. Tech

(Artificial Intelligence and Robotics)

Andhra University
Visakhapatnam, INDIA | 2018

Diploma in French

Andhra University
Visakhapatnam, INDIA | 2018

B.Tech

(Computer Science & Engineering)

MVGR College, JNTUK,
Vijayanagaram, INDIA | 2014

Intermediate (MPC)

Sri Chaitanya Junior College,
Visakhapatnam, INDIA | 2010

#Publications

Aspect Based Evaluation of Social Anxiety using Natural Language Processing Techniques

#LANGUAGES
